

Flower Exercise!

My Purpose

My definite purpose in life is to bring about a freer, more economically stable and prosperous world by improving upon the technology of cryptocurrencies like Bitcoin and Ether, and to expand the use of the Blockchain technology that will allow us to decentralize and improve much more than just money.

Special Knowledges

- Bitcoin
- Cryptocurrencies
- Anarcho-capitalist political theory
- Nutrition
- Music

Working Conditions

I think I'd like to work remotely, which fits my preferred "geography" well. But in the workplace, I like peace and quiet, working mostly by myself, and an emphasis on physical health (think: standing desks, even treadmill desks and healthy food).

Geography

I'd prefer to live in Uruguay, Thailand, Malaysia, or Mexico.

I want to leave the US as soon as possible, due to concerns about the economy, the national debt, the increasingly militaristic police, and the terrifying political 'leaders' that are running in the current election...

My Transferable Skills

Very good writer
Calm and pleasant
Confident
Motivated
Unique perspective on life and the world
Creative
Strong desire to effect positive change

My Pay and Level of Responsibility

- I want a lot of responsibility, not because I like having it, but because I know I need to be able to handle it if I want to make a serious impact, and I won't be satisfied looking back on my life if I didn't try my best to make a tangible positive change in how the world works.
- I prefer to get paid partially in Bitcoin. Skills gained are more important to me than salary.

My Favorite People Environments

- Passionate about creating a brighter future for the world
- Want to sacrifice their time and energy to bring about this future.
- Calm, positive energy
- Physically and mentally healthy
- Non-needy, independent
- Free-thinking/creative
- My favorite trait in others is a youthful, borderline-naïve belief that we can still save the world if we work hard enough at it – but only when it is followed up with massive action ☺
